

What's a **SKETCHER** / Non-Photo Blue Pencil?

903.302

- It's an art pencil used for rough sketches by cartoonists, comic-strip artists, film animators, illustrators, industrial and graphic designers.
- It's the perfect sketching pencil for Manga and Anime artists.
- It's a unique blue pigment that disappears when reproduced in a photo copy or scanned image.
- It's erasable too!

COMIC ARTISTS OFTEN USE 'NON-PHOTO BLUE' PENCIL FOR ROUGH SKETCHES. IT DISAPPEARS WHEN PHOTOCOPIED.

Draw a rough sketch using the SKETCHER pencil.

Now erase a small area. See it doesn't smear.

Then ink over the basic drawing. Notice the soft lead is not waxy.

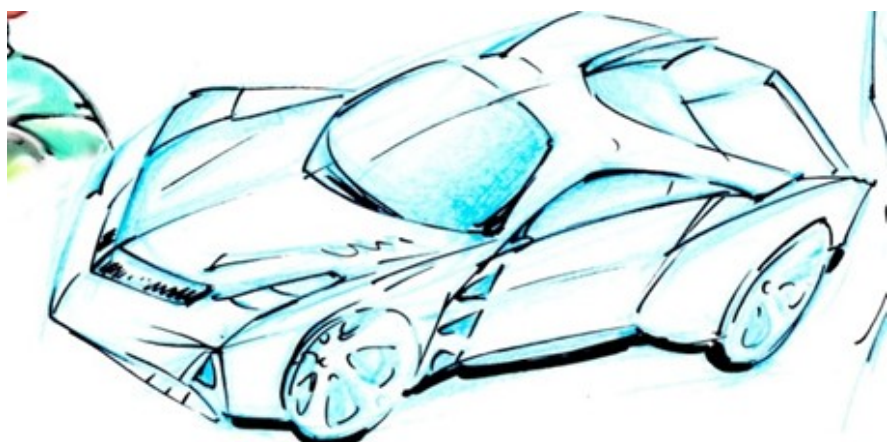

When the drawing is scanned or photo reproduced the blue lines disappear!

The coloring process can now be completed over the blue line sketch or over a newly printed drawing from the scanned image or photocopied image.

The ideal sketching tool for artist, cartoonist, film animators, architects, illustrators and designers.
