Created in 1929, the Fixpencil is an exceptional invention based on a century of expertise of the Maison Caran d'Ache. Its novel silhouette, unrivalled technical qualities, and wide range of leads have impressed generations of architects and designers turning into a unique icon.

For the world-renowned Swiss architect Mario Botta, every sketch is completed with a Fixpencil that creates a direct relationship between the thought and the drawing. This instrument is a source of inspiration in itself. Therefore, the shared values of Swiss excellence and creativity led Caran d'Ache and the architect to this passionate encounter with the Fixpencil.

**Creativity at the heart of a unique collection!**

Passionate about the Fixpencil, Mario Botta considers it as a natural extension of his hand. He wants above all to highlight its hexagonal structure through a checked motif designed as a contrasting superimposition of bricks. This inspiration gave rise to two unrivalled creations, including a multi-purpose box with an architectural silhouette and four colour leads for an undisputed emotional touch.
