**"The uniqueness of wood keeps me fascinated again and again."**

Wolfram Mümmler

# Design and tradition.

# Made in Germany

Konrad Ehmann

**The company was founded** in 1899 by Mr. Konrad Ehmann.

He established a production of nib penholders, the writing instrument of those days. Thanks to his efforts and diligence he led the company to high reputation. The company growth was enormous. More than 10,000 different models of nib penholders were produced for customers all over the world and he became Germany's largest manufacturer of nib penholders.

All products are still made on traditional turning machines in the classical manner. One of our major concerns is to keep the old traditions of classical manufacturing alive and to transform them into the modern production process. We manufacture at own production facilities with care and responsibility for the environment and our experienced workforce.

We combine native species with modern design and create jewels for life in elaborate handwork.

e+m factory around 1930

**Design by nature**

When you hold our products, you are holding nature in your hand: We utilize natural ergonomics when selecting our materials and shapes.

## Wood – the sustainable raw material

We are always mindful of sustainable forest management and prefer to process domestic wooden species.

Sustainability is our highest priority. Controlled forestry ensures that the number of trees felled in German forests is much lower than natural growth.

We, however, have also undergone FSC-certification to give our customers the certainty of controlled sustainability. The certification chain extends from the forests to the sawmill and up to the processor.

Only when all the strict rules of the FSC have been satisfied may the product bear the FSC logo.

The mark of responsible forestry

FSC® C013732

All products, which bear the FSC® logo, can be shown to come from forests which meet the internationally recognised principles and criteria of the FSC®.

A detailed description concerning size, print area and leads you will find below the product texts.

Species

We want to supply you with a high-quality wood product you will be able to enjoy for a long time. Our wood materials undergo a number of production and inspection steps to ensure quality. For example, most species of wood are generally stored up to two years just to let them dry properly, but some species have to dry even longer, up to seven years.

Wood is a natural resource. Any variations in color or texture are natural and are pointing out the individuality of our wooden products.

All our surfaces are based on ecological oils and waxes. All color stains are water-based.
