

VARIUS

RUBRACER, CARBON FIBRE & CERAMIC BLACK

GENUINE RUBBER

This material has a strong character and contemporary, urban elegance. Its inclusion in the Varius design promises an eminently masculine stroke. The brilliant rhodium contrasts with the soft matte rubber allowing the Rubracer to meet the demands and requirements of today's men. A screw inserted in the body of the pen, the newly articulated clip on the cap, and the broader nib confirm the Varius collection's energy and modernity.

CARBON FIBRE

Carbon fibre is the epitome of a modern material.

Its lightness and outstanding rigidity give it an immediate appeal and Caran d'Ache uses it to create a new, high-tech interpretation of tradition. Removed from its normal environment of top-level sports, and linked with silver-plated and rhodium-coated elements, carbon fibre brings power and strength to the Varius line.

CERAMIC

For the past few years, high-tech ceramic has been employed in the production of watchcases. This material is highly valued by the watchmakers for its lightness, its resistance to scratches and its silky touch. When associated with metal, ceramic offers a subtle contrast of materials and an elegant lighting effect.
