- Recommended for sketching rough drafts, drawing instruction and coloring.
- 30 colors, available in assortment or individually.
- Water based ink doesn't penetrate most paper.
- Washable from most modern fabrics.
- Conforms to EN71 (CE).

Color Chart (PDF)

Bundle 3 or 4 Fibralo marker pens together and draw lines or dots. Then mist with water and change the colors with a wet brush. This will dissolve the colors and make them even more intense.

## Techniques:

### Spot and wash tint techniques

Draw several spots about 1/8" in diameter on your paper and with a moist brush pull out the ink from the first spot and clean your brush. Now repeat in the other spots to create a cascade of wash tints.

### Sketching & coloring

The FIBRALO pens are ideal for concept sketching or artistic drawings. The rich saturated water-soluble colors deliver beautiful effects.

### Stencils

Using the FIBRALO pens draw a pattern using a stencil for parallel shapes and then pulled out the color with a moist brush to create new textures and patterns.
